Subject Index to Volume XX

Acetoin, production by *Enterobacter cloacae*, 1895
Achromobacter aceris, immobilized, NADP production by, 255
Activated sludge, coagulation with chitosan, 1945
  flocculability of organisms, 677
Activated sludge process, fluid dynamics and, 1745
  kinetics, 203, 1565, 1685, 1883
  organic polymer uptake in, 1745
Aeration, effect of inoculum size on, 1045
  enhancement of oxygen absorption in, 697
Aeration capacity, measurement of, 305
Affinity chromatography columns, performance of, 267
  photocontrol of, 1775
Airlift fermentors, oil dispersion and gas holdup, 487
Alcohol dehydrogenase, horse liver, immobilized, 1117, 1125
Algae, growth yield of, 1493
AMP, cyclic, and enzyme biosynthesis, 1797
Amylase, and starch hydrolysis, 1303
  β-Amylase, soybean, immobilized, 383
Amyloglucosidase, immobilized, 1319
Anacystis nidulans, photosynthesis in, 119
Analysis of fermentation broths, 1295
Arthrobacter simplex, steroid transformation by, 1267
Asparaginase, purification of, 1775
  L-asparaginase—collagen membrane, properties of, 1143
Assay, filter paper, for cellulase, 297
Axenic cultures, 1883

Babassu, ethanol production from, 443
Bacteria, growth on C_1 compounds, 1557
  growth on polymers, 865
  mass cultivation of, 921
Biomass (see also Protein, Microbial)
  determination, 1501
  production, 73, 1027, 1691
Biomethanation, 1153
Biopolymers, from *Candida ingens*, 619
  NAD derivatives, preparation of, 769
Bubble columns, mass transfer in, 287

Candida guilliermondi, growth on hydrocarbons, 1455
Candida ingens, exocellular polymer from, 619
Candida lipolytica, culture on *n*-hexadecane, 1833, 1849, 1851
Carboxypeptidase-transpeptidase, purification of, 577
Cassava, saccharification of, 555
Catalase, immobilized, 1201, 1507
Cell disintegration, ultrasonic, 1287
Cellodextrins, preparation of, 1669
Cells, immobilized, 17, 127, 217, 255, 1267, 1667
  NADP production by, 255
  steroid dehydrogenation by, 17, 1267
  urocanic acid production by, 217
Cellulase, determination of, 297, 837
  filter paper assay for, 297
  fungal, 555
Cellulose, adsorption by *T. viride*, 1187
  for enzyme immobilization, 383, 665
Cellulose hydrolysis, biomass determination in, 1501
  economics of, 503
  enzymatic, and yeast fermentation, 1291
  enzyme deactivation during, 847
  kinetics, 637, 847
  mechanisms, 317
  model for, 141, 637
  with radiation-induced decomposition, 1309
  radiation induced, 1309
  sawdust, 1735
  straw, 567
Chaetomium cellulolyticum, for microbial protein, 107
  cultivation on sawdust, 1735

Biotechnology and Bioengineering, Vol. XX, Pp. 2025–2029(1978)

Chitin, for enzyme immobilization, 135
Chitosan, for coagulation of activated sludge, 1945
for coagulation of cheese whey, 1957
for lysozyme isolation, 87
production of, 1931, 1945, 1957
products, characteristics of, 1931
Chromatography (see Affinity Chromatography)
α-Chymotrypsin, immobilized, 773
Citric acid production, batch culture, 1711
Collagen, for enzyme immobilization, 1785, 2007
Computer control, 1459
Continuous microbial processes, 1295, 1479
Culture methods, pH-Auxostat, for bacteria, 921

Diacetyl, production by *Enterobacter cloacae*, 1895
Dialysis, continuous, for analysis of fermentation broths, 1295
Diffusion, in enzyme membranes, 1785
in immobilized enzymes, 455, 1817

Economics, cellulose hydrolysis, 503
Electrode, enzyme, for penicillin measurement, 527
oxygen, effect of air holdup on, 913
for aeration measurement, 305
response of, 903
Energy balances, 1595, 1623
Enterobacter cloacae, acetoin and diacetyl production by, 1895
Enzyme biosynthesis, 1797
isolation, 159, 577, 1967, 1989
kinetics, 281, 403, 605, 1249, 1853
production, 159
reactors (see Reactors, Enzyme)
Enzymes, immobilized, 1, 95, 135, 243, 309, 333, 383, 611, 665, 773, 1085, 1117, 1125, 1143, 1201, 1319, 1377, 1445, 1465, 1507, 1651, 1667, 1785, 1817, 1903, 2007
deactivation, 781, 821, 1235, 1471
determination of, 297, 837, 1407
kinetics of, 455, 1201, 1507, 1785, 1817
preparation of, 1, 95, 135, 309, 333, 383, 611, 665, 773, 1319, 1377, 1465, 1507, 1651, 2007
reactors for, 781, 1547, 1785, 1903
stability of, 1085, 1117, 1445, 1507
Enzymes, proteolytic, 1865
treatment of sewage sludge, 1221
Escherichia coli, β-galactosidase from, 159
Ethanol, determination of, 799
fermentation, 709, 799
in Rotorfermentor, 709
Ethanol production, from babassu, 443

Fatty acids, toxic effects on yeast, 1235
Feed, animal, from straw, 1015
Fermentation broths, analysis of, 1295
Fermentation process design, 625, 1595, 1623, 2011
Fermentors (see Reactors, Biological Process)
Filters, submerged biological, 151
trickling, capacity of, 292
Flocculability, chemical, of sludge organisms, 677
Formaldehyde, role in C_1 utilization, 421
Fructose syrups, production from inulin, 447
Fuel cell, biological, 1687
Fusaruim moniliforme, for microbial protein, 1027

Galactosidase, isolation from *E. coli*, 159
1,4-Glucan phosphorylase, isolation of, 1989
Glucoamylase, immobilized, 135, 1445, 1651
Gluconolactonase, immobilized, 1651
Glucose isomerase, immobilized, 1377
Glucose oxidase, immobilized, 611, 821, 1201, 1651
Glucose uptake, measurement of, 1487
Growth, bacterial, on C_1 compounds, 1557
on polymers, 865
measurement of, 1101
substrate limited, 183
Growth kinetics, in hydrocarbon fermentations, 1723
in yeast, 301
models, 301, 349, 927, 1873
yields, 1493, 1691, 1883

Hornblende, for enzyme immobilization, 1445

Hydrocarbon fermentations, *Candida guilliermondi,* 1455
Candida lipolytica, 1833, 1849, 1851
kinetics of, 1723
oil dispersion in, 465, 487
yeast determination in, 1097, 1285

Immunoglobulins, immobilized, characterization of, 1129
Inulin, fructose production from, 447
Ion exchange resins, for enzyme immobilization, 611, 1377

Kinetics, activated sludge, 203, 1565
cellulose hydrolysis, 637, 847
citric acid production, 1711
C_1 compound utilization, 421, 1557
enzyme (see Enzyme Kinetics)
growth, 183, 301
hydrocarbon fermentations, 1723
immobilized enzymes (see Enzymes, Immobilized)
nitrification and denitrification, 43
Klebsiella pneumoniae, enzymes from, 1989

Lactic dehydrogenase, shear deformation effects on, 603
Leucine production, redox potentials and, 27
Lyase, immobilized, 95
Lysozyme isolation, 87

Maltose, production with immobilized β-amylase, 383
Mass and energy balances, 1595, 1623
Mass transfer, in biological reactors, 601, 709
in bubble columns, 287
in polysaccharide fermentations, 939
Media, for xanthan production, 1003
Membranes, enzymatic, 1143, 1785
liquid, 1667
Methane, production by biomethanation, 1153
Methanol oxidase, immobilized, 333
Micrococcus denitrificans, membrane encapsulated, 1667
Mixing, in hydrocarbon fermentations, 465, 487
in polysaccharide fermentations, 939
shear inactivation in, 451
Mixing time, measurement of, 1487
Models, activated sludge process, 1685
AMP and enzyme biosynthesis, 1797
cellulose hydrolysis, enzymatic, 141, 637
continuous cultures, 1479
enzyme inactivation, 1471
fluidized-bed enzyme reactor, 1903
growth, 301, 349, 927, 1873
hollow-fiber enzyme reactors, 1547
oxygen transfer in shake flasks, 1695
photosynthesis, in *Anacystis nidulans,* 119
submerged biological filter, 151
yeast growth, 301
yeast protein from ethanol, 1523

NAD, high-molecular-weight derivatives, 769
NADH, catalytic oxidation and decomposition, 403
NADP production, by immobilized cells, 255
Nitrification and denitrification, kinetics, 43

Optimization, fermentation, 625
multienzyme systems, 243
Oxidoreductase enzymes, potentiometric determination of, 1407
Oxygen, solubility of, 145
Oxygen absorption, enhancement of, 697
Oxygen electrode chamber, growth rate measurement in, 1101
Oxygen electrodes, effect of air holdup on, 913
evaluation of responses, 903
for aeration capacity measurement, 305
Oxygen transfer, interfacial, 157
in pulsed tubular fermentor, 1393
in shake flasks, 1695
measurement of, 305, 809

Paper, mycelial, 1063
Paper wastes, biological treatment of, 203
Pectinolytic activity, *Saccharomyces fragilis,* 231
Penicillin, enzyme electrode for, 527
Phanerochaete chrysosporium, microbial protein from, 1639
Phenol, resistance to, 917

Plasma, human, continuous fractionation of, 1037
Platinum black, role in bio-fuel cell, 1687
Polyesters, for enzyme immobilization, 309
Polymers, bacterial growth on, 865
for enzyme immobilization, 309, 1319
styrene–maleic anhydride, for enzyme immobilization, 773
Proteases, immobilized, 1
stabilization of, 1865
Protein, determination of, 461, 1501
extractability, 755
of *Fusarium moniliforme*, 1027
recovery from cheese whey, 589, 1957
microbial, from wood and bark, 107, 1639
production of, 107, 1027, 1045
yeast, 755, 1329, 1523
Pseudomonas putida, resistance to phenol, 917
Pullulanase, immobilized, 665
isolation of, 1989

Reactors, biological, mass transfer in, 601
biological process, 709, 727, 937, 1345, 1393
continuous, 937, 1393
fluid dynamics of, 1577
glass, 1345
pulsed tubular fermentor, 1393
sampling, 767
upflow, 1577
Reactors, enzyme, 781, 1547, 1785, 1903
hollow fiber, 217, 1547
rotating membrane, 1785
Redox potentials, respiration and leucine production, 17
Resins, anion exchange, for enzyme immobilization, 1
Respiration, endogenous, in trickling filter, 292
redox potential and, 27
Respiratory quotient, microprocessor control of, 1459
Saccharomyces sp., 1111
Rheological properties, time variant, 1679

Saccharomyces fragilis, pectinolytic activity, 231
Saccharomyces sp., fermentation and respiration, 1105
respiratory quotient of, 1111
Sawdust, cultivation of *Chaetomium cellulolyticum*, 1735
Scale-up, of polysaccharide fermentations, 939
Shake flask, oxygen transfer in, 1695
Shear, effects on lactic dehydrogenase, 605
inactivation in mixing, 451
Silicone, effects in yeast cultivation, 899
Single-cell protein (see Protein, Microbial)
Sorbitol dehydrogenases, immobilized, 1785
Sporotrichum pulverulentum, cellulose hydrolysis by, 317
Starch, chain length distribution after hydrolysis, 1303
Steroids, continuous dehydrogenation of, 17
transformation, 1267
Straw, alkali treatment and fermentation of, 1015
fermentability of, 567
Streptomyces flavochromogenes, pullulanase from, 665
Streptomyces strain R61, carboxypeptidase–transpeptidase of, 577

Tannery waste, and protein recovery, 589
Tannic acid, for enzyme immobilization, 665
Titanium, in enzyme immobilization, 95
Trichoderma viride, cellulose adsorption by, 1187
Trypsin, in cheese whey processing, 1173

Ultrasonics, cell disintegration by, 1287
Urate oxidase, immobilized, 1085
Urethane prepolymers, for enzyme immobilization, 1465
Urocanic acid, production of, 217

Waste treatment, biological, 43, 203, 292, 1221, 1565, 1577, 1685, 1745
anaerobic, 1577
Whey, coagulation with chitosan, 1957
protein recovery from, 589

Whey protein, solubilization by trypsin, 1173

Xanthan gum, production of, 1003
Xanthine oxidase, immobilized, 1085, 1507

Yeast, growth on ethanol, 1523
growth on glucose–cellobiose mixtures, 921
growth kinetics, 301, 927
measurement in hydrocarbon fermentations, 1097, 1285
protein from, 755, 1329
toxic effects of fatty acids on, 1235
Yeast cultivation, effects of silicone on, 899
Yeast fermentation, and enzymatic hydrolysis of cellulose, 1291
